

# Gift pyramid assembly instructions

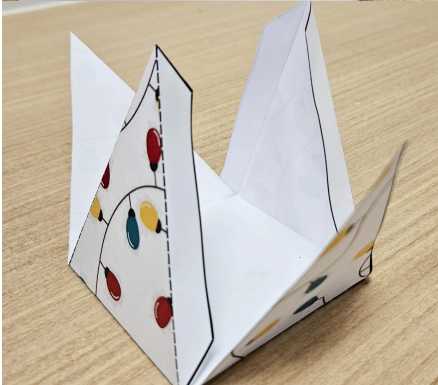

## Materials needed

- Printed template on thick paper or cardstock
- Scissors
- Ruler (optional)
- Glue or double-sided tape

### Cut out the template

Carefully cut along the outer solid lines of the template. You should end up with the entire shape as one piece.

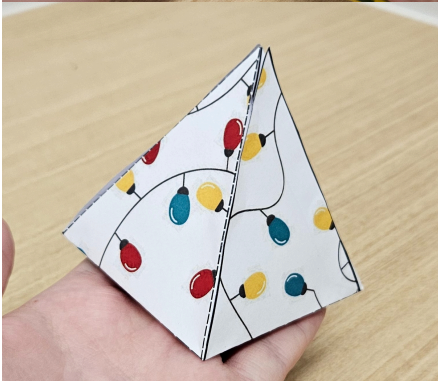

### Fold along the lines

Fold all the dashed lines inward so the design forms the base shape of the pyramid. Fold the dashed lines on the tabs to create the edges of the box. You can use a ruler for folding

### Assemble the sides

With the folds in place, bring the triangular sides up toward the centre. This will form the walls of the pyramid.

### Glue or tape the flaps

Apply glue or tape to the flaps along the edges where the sides meet. Press firmly to secure each side to its neighbour, creating the pyramid shape. Before gluing the last side, add a little gift or sweet treat.

### Finish and close

For the final touch, check all sides to ensure they are secure. Once everything is set, you should have a small pyramid box that can be used as a gift box or decorative item.
